01

45 Series WOODEN DOOR

"Where the
natural
elegance of
wood meets
the enduring
strength of
aluminium."

Wooden aluminium doors combine the natural warmth and elegance of wood with the durability and modern appeal of aluminium. These hybrid doors feature an internal layer of wood, offering aesthetic charm and insulation, while the exterior layer of aluminium provides robust weather resistance and minimal maintenance. This combination not only enhances the visual appeal of a property but also ensures superior thermal performance and security. Wooden aluminium doors are increasingly popular in both residential and commercial architecture for their eco-friendly materials, design versatility, and long-lasting performance.

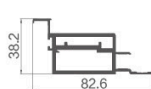

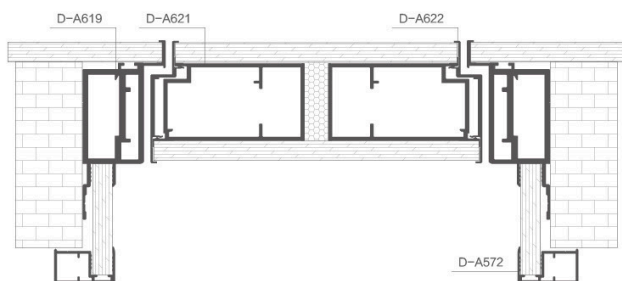

02

50 Series INVISIBLE DOOR

"Seamless strength, hidden in plain sight — the invisible aluminium door."

Sleek, sophisticated, and nearly imperceptible, the invisible aluminium framed door is the perfect harmony of modern design and advanced engineering. Crafted with ultra-slim aluminium profiles and flush-fitting technology, it blends seamlessly into walls to create a clean, continuous aesthetic. This door redefines minimalism offering uncompromised strength with a design that disappears into its surroundings. Whether in high-end residences or contemporary commercial spaces, it delivers both visual subtlety and structural integrity.

40 Series HINGE DOOR TYPE-1

"A slim door
with hidden
hinges for a
seamless,
modern look."

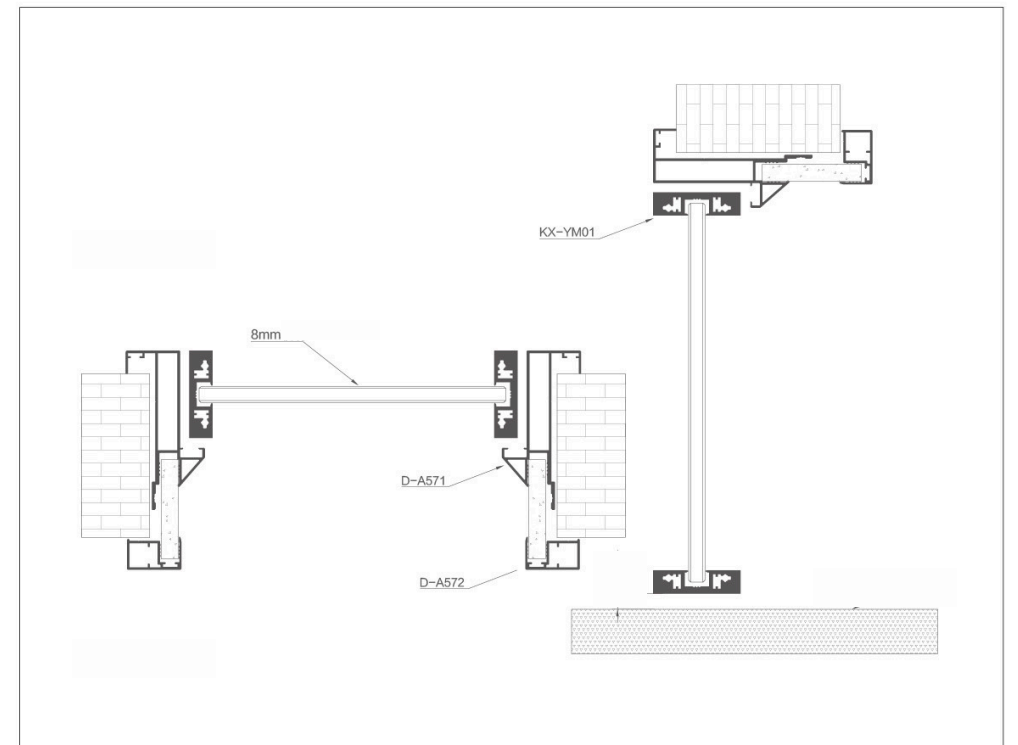

Designed for modern interiors, the slim internal hinge door offers a clean, minimalist aesthetic with concealed hinges that remain completely hidden when the door is closed. Its sleek profile blends effortlessly with walls, creating a seamless look while ensuring smooth, silent operation. Ideal for contemporary homes and refined commercial spaces, this door combines understated elegance with smart functionality.

05 40 Series SOFT CLOSING SLIDING

"Smooth, quiet
motion with
top-hung soft-
closing sliding
design."

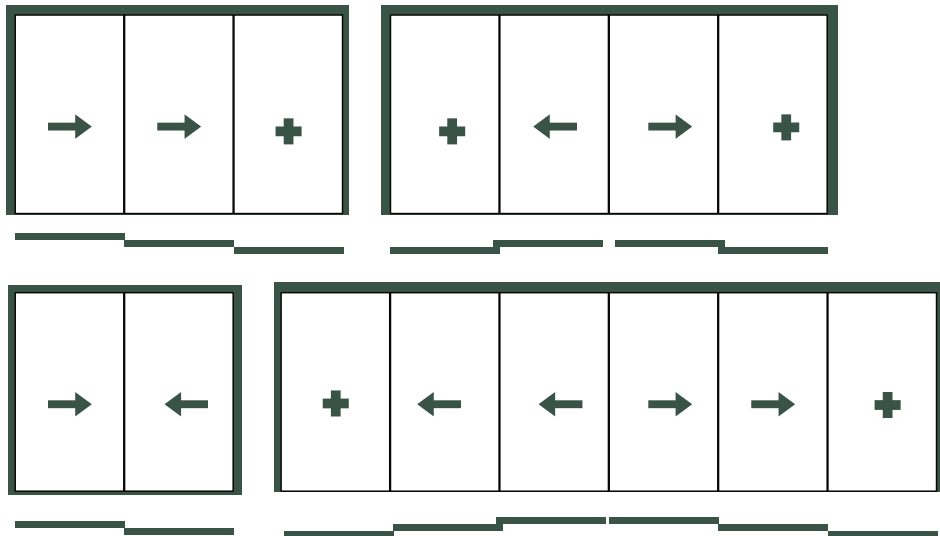

INTRODUCTION

Soft-closing sliding doors bring effortless elegance and quiet precision to modern interiors. Designed to glide smoothly and close gently, they enhance comfort while protecting the door from impact or wear. Available in a range of typologies—including single, double, telescopic, and pocket sliding systems—these doors adapt seamlessly to diverse architectural needs. Whether dividing spaces or enhancing flow, soft-closing sliding doors combine style, safety, and versatility in every movement.

06 80 Series GLASS PARTITION

"A sleek
double-glass
partition for
enhanced
sound
insulation and
modern
transparency."

Combining contemporary design with functional performance, the double glass partition offers an elegant solution for dividing spaces while maintaining openness and light flow. With two layers of glass, it enhances acoustic insulation and structural stability, making it ideal for offices, meeting rooms, and modern interiors. Sleek aluminium profiles and customizable finishes ensure it complements any architectural style while delivering comfort, clarity, and privacy.
